

-3724-

We could if we would or rather develop through study and meditation our INNER more subtle and interior sense organs. They are the REAL INNER man and woman. By the way: Whenever I say "man" I mean man AND woman, since I use the term "man" in connotation with "maṇas", the thinking principle and power in both, man AND woman.

- Why could the inner man perceive the worlds unseen to the outer man?

Because the inner man is that part of our constitution, linked to the inner part of the cosmos, the outer man to the outer part of the cosmos. DM.

- of how many atoms is a small prape made? <sup>(Cardinal number equal to 10<sup>24</sup>)</sup> Sextillions of atoms. Now you can imagine of how many atoms the entire universe is formed, and each of those atoms is the expression of a Maṇas, a "god in the becoming" or "a god in the making." DM.

-3725-

- of what is each universe built?

Of minor universes, each of them copying its parent universe.

- What are the suns and their planetary systems?

Cosmic atoms of ADAM KADMON.

So there is a law of analogy. Study the links and you have the first key to the world secret.

The entire universe is the sum total of embodied consciousnesses, which are in different degrees of evolution.

- When did we arrive on earth?

Ages ago. In aeons from now we shall return to the inner realms.

- And then?

We will be gods.

- What is the cosmic logos?

An individual, a cosmic spirit, supreme for its own hierarchy.

- Why?

Because it is the source and origin of it. The Logos lives and expresses itself through us.

-3726-

Who gave us mind or soul and it?

The Mānasaputras. Without them most of us would still be "apalike".

- How did they do it?

Through an act of self-sacrifice, though under karmic impulse. One day we will become Mānasaputras for others.

- Who were those Mānasaputras?

They were ethereal beings, on Earth, since beginning of this round.

- Were they of higher grade?

Of a far higher grade than we ourselves will be even in aeons from now.

- Why did they come to Earth?

In order to watch over and guide the evolution of the first 3 races.

- What have they to do with the Lodge of our masters?

They created it.

- But the lodge is of high adepts?

The mānasaputras created it.

How?

By the power of kriyā śakti.

These beings passed on the knowledge,

-3727-

They enlightened the mind or manas, that part of the septenary of early humanity.

Why?

- Because they themselves are typically mānasic in their Swabhāva, or essential characteristic.

- How did that esoteric work from the "Sons of Mind" or Mānasaputras on ourselves then many millions of years ago?

The vibrations (mental) of the Mānasaputras caused the essence of manas of early mankind to vibrate.

- How?

Much as sound of musical note will cause response in something, or rather in a similar note in other things.

- Who, who, who are the Mānasaputras?

In a sense they are ourselves, but on the other hand we are those vehicles who were quickened or enlightened or activated by them in our thinking or mental ability. DM. It is a mystery!

-3728-

- Who gave us our 7 principles?  
Forces other than ourselves gave us 3.  
- So THEY are responsible?  
Vice versa.  
- Where do our 4 lower principles originate?  
They evolved out of ourselves, but in combination with elements drawn from nature.  
- What about our three higher principles?  
They are each a separate entity, though united during manvantava.  
B.O.L. teaches: Unity becomes multiplicity, resolving itself into unity.  
- Do you mean union by unity?  
No, because unity is things put together with a common head or source, but union is those things put together without head or source.  
- What then would be ... ONE?  
The Monad, because indivisible.  
- So what are we? Unity or Union?

-3729-

We are both, unity and union.  
- I don't understand.  
We are union, concerning our lower principles, being 4. And we are unity in our 3 higher principles.  
- The upper triad?  
Yes. The upper 3 principles form the upper triad.  
- Where do they exist?  
Each on its own plane.  
- Do we feel them?  
Yes, since we are in spiritual connection with them, according to our state of evolution.  
- What do we know of MANAS, the thinking principle?  
That what we have assimilated of it in the 4th (this) round.  
- When will our manas be fully evolved?  
Not until the end of the 5th round.  
But by that I mean the HIGHER Manas, therefore, raise your consciousness from the lower into the higher.  
Activate your 3 higher principles.

-3730-

- How does one race evolve out of the preceding?  
At the middle point of the former.  
At present we are in the fifth root-race, two races are left to complete our globe-cycle or globe-round.  
- When and where will the 6th root-race come forth?  
It will branch off at or from the middle of our Fifth Root-Race.  
- Into how many races is each root-race divided?  
Into 7 minor races and their minor divisions, all taught in B.O.L.  
- Is the ROOT RACE one of the seven?  
No. Because that would count the primary race or rather the primary sub-race twice.  
- So from the primary <sup>sub</sup>race grow all the others?  
Yes, and therefore the primary sub-race is the true root-race.  
- Please give equation of races and their rounds.  
1) 7 root races - 1 globe round. 2) 7

-3731-

globe rounds - 1 planetary round. 3.)  
7 planetary rounds - 1 kalpa. - in years 4,320,000 (4.7 kalpas + 7 planetary pralayas - 1 solar kalpa.  
- How does nature repeat itself?  
In seasons, year after year, day and night year after year, planets circle around each other. Repetition everywhere.  
Alike puts forth alike. There is also repetition of law of birth etc. And yet everything differs from each other.  
There is no atom alike.  
- Please reveal to me the secret of the Manusaputras.  
Ask me.  
- In what direction are we travelling?  
Inwards. Because that is where we come from.  
- We descended from inside?  
Yes.  
- Why?  
Driven by desire and in order to spiritualize matter.  
- What is the path?  
WE are the path. When we return we will be higher in awareness.

- I understand. Now the monadic life wave passes down from the spiritual to the material, globe after globe, from A-B-C-D-E, F and G?

DM.

- What is the difference between a chain-round and a globe-round?

A chain-round is a passage of 7 life-waves through 7 globes once.

A globe-round is the traversing of any one globe by the 7 life-waves.

- Are those the "inner rounds" taught in B.O.L.?

Yes, and the outer rounds point towards passages of life-waves from, through and into the 7 sacred Planets of the ancients, etc.

- How many root-races are there in this Fourth Round?

Seven root-races, forming the evolutionary cycle.

- Where are we now?

Fourth sub-race of our present Fifth Root-Race.

\* globe and chain rounds.

To what loka belong globe A+G<sup>-3733-</sup> of earth chain?

Maharloka. Globes B+F belong to Svarloka.

- These two lokas are etheric?

Yes, the material-physical ones are for globe C+E Bhuvraloka,

and for globe D (our earth physical) Bhurloka. All lokas interpenetrate each other.

The secret of lokas and talas is revealed in B.O.L.

- Am I a bhurloka being?

Yes, but the etheric part of your constitution contains the essences, belonging to all other lokas and talas, including their attributes until down to the lowest. So beware...

- Is that why B.O.L. teaches: "Macrocosm reflects in microcosm and vice versa?"

- Yes.

- What is an atom?

Embodied THOUGHT.

<sup>-3734-</sup> - I still don't understand how the Logos can become the entire solar system including all the atoms building it?

- Because logos lives, is built itself of interworking forces, influencing the physical through the etheric.

- What is a "loka"?

A place or locality. It inhabits rūpa or forms.

- What is meant by form?

An atomic or monadic aggregation, guided by indwelling consciousness.

- So then arūpa means something that has no form?

That would only apply to the monad per se. Other than that "arūpa" is something that has no

physical form, but rather a form more etheric than a physical form.

- So in arūpa world we are made of ether?

Yes, the arūpa part of us is made of ENERGETIC SUBSTANCE.

Higher beings are clothed in bodies

<sup>-3735-</sup> of LIGHT, but not light as we know it.

- How many lokas are there?

For now: 7 lokas, 3 of them arūpa and 4 are rūpa.

- What is the eighth sphere?

Next question.

- What is pararūpa loka?

Divine world. It is goal and source.

- I don't understand.

From divine world flow forth the 7 grades below it, at the same time that divine realm is the home and goal of those whose spiritual evolution has been concluded. DM.

- What is bhur loka?

Physical sphere of our entire universe.

- Are lokas and talas parts of the universe?

They ARE the universe. They interpenetrate, and interwork with, each other, being an organic unity.

- How do the lokas unfold at reawakening of the universe?  
 Satya loka (pūrvast) and its talā evolve forth all other lokas and talas, being reflections of 1st loka and talā.  
 Evolution as follows: satya loka - tapar loka - janar loka - until lowest bhūr loka (our physical world).  
 - But there are seven!  
 So then name the missing ones.  
 - Mahar-loka, svar loka, bhūvar loka?!  
 Now entire order of enrolment.  
 - Satya enrolls Tapar, Janar, Mahar and svar, Bhūvar and Bhūr loka.  
 OM.  
 - How do they unroll? And inroll?  
 As described in Hebrew and Christian scriptures: "All the host of heaven shall be dissolved, and the heavens shall be rolled together as a scroll." (Isaiah 34:4. And: "And the heaven

departed as a scroll when it is -3737- rolled together." (Rev. 6:14).  
 (both describing inrolling).  
 - Buddha escaped that transiency?  
 Yes.  
 - Are the 7 sacred planets, forming with our earth a planetary family, connected with the hosts of other worlds?  
 Yes, but more intimately the 7 sacred planets are connected among themselves. OM.  
 - Do we see all lowest planes of all planetary chains in our solar system?  
 No, because in that case their lowest planes are above our fourth cosmic plane.  
 - And beyond that 4th plane?  
 There are other chains.  
 - And beneath?  
 There are cosmic planes and chains of whom even the HIGHEST planes are below our 4th plane.  
 - So all heavenly bodies we see are 4th plane planes?  
 Without exception as far as our solar system is concerned.

- What is the difference between Swabhāva and Swabhavat? -3738-  
 The difference is already in pronunciation, or rather pointing at it, by pronouncing it differently. Swabhāva has a prolonged 'ā' in it, overlined, and spoken like the 'a' in father, while Swabhavat has no overlined 'ā'. This 'a' must be spoken like the 'u' in but.  
 - That is just little difference.  
 No, it is not.  
 - But both derive from same vast Bhū?  
 Yet they are different in meaning. Swabhāva means self-becoming, self-begetting. Nothing in nature is purely mechanical or soulless. Swabhāva also means, the each of us brings forth (step by step) what is IN us. Same counts for minerals, plants and animals.  
 - And Swabhavat?  
 It is a state of cosmic conscious-

-3739-  
 ness.  
 - What are spirit and matter in that source?  
 They are one. No longer dual in manifestation.  
 - And beyond that?  
 Don't ask. BE it! Therefore: Swabhavat and Swabhāva are close as words in origin, but not the same in meaning.  
 - I understand! Swabhavat never descends from its own condition! It is Father - Mother, kalpic akāśic substance, while Swabhāva is self-generation of everything, of any mind and entity!?  
 OM! Now you got it.  
 Swabhavat is the infinite reservoir of being, consciousness, light and life.  
 - So the "forces" of nature, as science calls them, derive from it?  
 OM. Swabhavat is the cosmic reservoir, of being and being - its spirit-substance.

-3740-

- Is that what is meant, when we read in Bhagavad-Gita: "I manifest this universe with portions of myself, and yet remain separate and superior thereto."?
- Yes. The Logos itself speaks there.
- Am I a Logos too?
- Yes we all are logos in our 7 fold or tenfold constitution to the Monads and their atoms (of our body).
- What is consciousness?
- Essential and unitary, but during manifestation divisible, just as cosmic consciousness of the logos does. OM.
- What is all visible?
- ~~Six-sevenths of the invisible~~
- One seventh of the entire structure.
- And the other six-seventh?
- Still invisible to us.
- With what are the 7 globes of our earth chain connected?
- With the 7 sacred planets, and their sevenfold worlds or globes.

-3741-

- Please define "sacred planets".
- Enclosing divinities rather than physical bodies (light-spots).
- What about the spirit of the earth?
- It fills the globe with seeds of manas or mind.
- From where are forces paired into our globe?
- From within.
- Leading to radioactivity?
- Since about 3 million years, yes.
- Is any planetary chain a closed system?
- Yes, but it nevertheless receives from the sun and other chains force and substance.
- Why?
- In order to experience increase of consciousness.
- Is there conservation of energy?
- Yes but not purely mechanistic and materialistic as science thinks, because science thinks of this universe as a closed system, which it is not really, as already explained.
- Is there a really "closed system"?
- Yes, it is boundless infinity. That, in turn, would include all possible energies and substances such infinity.

-3742-

- contains... THEN it would be a "closed system". But our little universe, interacting with all others, is "closed" to a certain extent, but still very open and influenced by other universes, etc.
- Please give an example.
- Compare it to a room. A room is a closed system, including all it contains (chair, table, etc. incl. the person living in it). At the same time that room, that "closed system" is influenced by other energies, including air, weather, and the structure of the building itself.
- I don't understand, concerning "boundless infinity".
- That is understandable. To "infinity" or "infinite" or to such a system no forces could be added from outside, because there is no "outside" for infinity. If there would be an "outside" to infinity, then infinity would be no longer infinite.
- I begin to understand...
- Because you are chaotic, or fall less one. Continue to ask.

-3743-

- Is the sun a physical body?
- Not really, but the sun that you see is a fourth plane globe. At the same time the sun is a ethereal body in 6th and 7th state of matter.
- How does it manifest?
- As light and radiation.
- What are the 7 sacred planets?
- Saturn, Jupiter, Mars, the Sun, Venus, Mercury and the moon.
- Two of them, sun and moon, are substitutes for secret planets.
- Who are these secret planets?
- Revealed in B.O.L.
- What are the secret sacred planets to us?
- Intimately connected with us...
- They are all together an Ogdoad.
- Why?
- Earth chain is the 8th in it (but not second)
- Are there more than 7 sacred planets?
- Yes, 12 of them, which includes the "five highest".
- So our planetary chain has actually 12 globes?
- Yes, built by the 12 sacred planets or planetary chains. OM.

-3744-  
-I still don't understand how the 7 families or life-waves pass from globe to globe of the chain?  
In succession.  
-For what purpose?  
To gain experience of the forces of matter including of the various cosmic planes. Overcome desire for it, and you have overcome.  
-What is the Christian god?

A creator, a demiurge, which classifies him or it as one of endless many elohim, since creation implies LIMITATION, or rather restricted activity.

-Within something greater?

YES. You begin to understand.

-But what is the THAT or TAT of or in the VEDAS?

neither creator nor non-creator. It is simply DEVOID of attributes.

-Buddha attained it?

Yes. But he even overcame TAT.

-3745-  
-Is it the Adi-Buddhi of northern Buddhism?

Yes. It is their "Primal Buddhi".

-Are there other names for that cosmic reservoir Swabhavat?

"Akāśa" of Brahmanical scriptures, cosmic "waters" of Hebrew Old Testament.

-Are lost souls "soulless beings"?

No. Lost souls have a monadic ripture.

-What is that?

The "golden thread" uniting the lower thinking entity with the higher self is ruptured completely.

-broken completely off from its higher self?

Yes. Such a being is truly lost.

-Where does it end?

Such being or monadic reflection will sink at death into the "Earth sphere".

-The planet of Death?

-3746-  
-yes. Many worldly and religious rulers are among such lost souls.

-But what then is a soulless being?

Its golden thread, connected with the higher self has been worn, very thin, but not yet ruptured completely.

There is still hope...

B.O.L. teaches: lost souls are beings who are or were so utterly complete: EVIL (black magicians, etc.) that they cut themselves off COMPLETELY from their Monad. But "soulless" beings are not yet that utterly evil.

-How can "soulless" beings be saved from becoming "lost souls"?

One single holy impersonal aspiration suffices to cause reunion with the Monad. I give you an example: Even when one just has THE BOOK OF LIGHT in his home, WITHOUT even having read

-3747-  
the book, he can NEVER be or rather become a lost soul.

Souless people live almost in their lower principles: Food and sex.

-In other words THE MAJORITY?

Yes. Such, or rather most, people have no moral sense, but are often mentally and psychically very strong. We find these people <sup>also</sup> often as worldly and religious leaders, abusing their power.

So hell awaits them after death, and then a new life of pain and suffering.

-so the world of today is in a terrible situation?

-yes. I see no other salvation for all of us but THE BOOK OF LIGHT.

-May it save us all. What are we human beings?

We are composite beings, with an immortal imperishable monad.

-What with the Monad of a "lost soul"? The Monad will forget such being and

reflect newly into material world. -3748-

- How did I become what I am?  
 you loved for it, or rather now you  
 earn the result of your loving.  
 That teaches you what you should  
 want and what not.

- What happens when we only think  
 selfish thoughts, running down -  
 words?  
 The golden thread uniting you with  
 the monad, wears out. Some, though,  
 have a "silver thread".

- Please reveal to me the secret of the  
 planet of Death and what it does  
 to "lost souls"

No.

- Please reveal to me the secret of  
 the planet of death!

Now that you ask all in all 3 times  
 I shall respond. Spiritually evil peo-  
 ple, among them most of our worldly  
 and religious leaders, shall suffer  
 avichi-nirvana on "The Planet of  
 Death". They suffer "eternally".

- Give an example please. -3749-

Imagine someone drills on your teeth,  
 and their NERVES but without you  
 losing consciousness. A lost soul is their  
 victim of revenge, hatred and autopain,  
 generated by itself! It is a fallen  
 spirit, crystallized into matter, ex-  
 perencing on "the planet of death"  
 A EONS of misery, until it fi-  
 nally dissolves.

- What is a lost soul in comparison to  
 of a Chohan?

A Chohan is the high pole of con-  
 sciousness, a lost soul is the low  
 pole.

- When will I become a master?  
 When your corruptible will become  
 incorruptible.

- What with Monads whose vehicles  
 were lost souls?

Those Monads reflect again, but  
 it may happen that they remain  
 behind, as the racial life wave moves  
 on.

- They will have to repeat the round?

- I have questions to planetary chain  
 of earth and its rounds. -3750-

Ask me.

- Earth chain has seven globes. Where  
 does the life wave begin on these  
 globes A, B, C, D, E, F and G?

It begins on globe A or rather be-  
 gan there, running there through cycles,  
 then entering globe B, completing  
 there, entering C, completing there  
 entering D.

- Where are we now?

On planet D in the fourth round,  
 half way around and a bit more.

- In which race are we on that 4th  
 round on globe D?

In the 5th root race.

- How many races to be?  
 7 root races.

- Of what are the 7 globes of the plane-  
 tary chain built?  
 Of the elemental bases of the 7 principles  
 of nature.

- Why are they called rudiments? -3751-

Not because they are incomplete but  
 root-things, originants.

- Is there a Sanskrit word for them?

Tattwa. It means "a reality".

- The ABSOLUTE reality?

No, but the root differentiations of  
 any Hierarchy.

- Are these elements the "Bhūtas"?

Yes. Each element springs from its pre-  
 decessor (superior) giving existence to  
 another. This other is then its inferior.

- How many elements are there?

B.O.L. teaches 7.

1.) The principle element Ādi-Bhūta  
 emanating 2.) Anūpapādaka - tattwa,  
 followed by Aether, Fire, Air and Water.

- I don't understand the first two.

The first is the element  
 having as principle Ādi-Tattwa. The se-  
 cond does not proceed from anything else,  
 hence anūpapādaka or "parentless".

\* in manifestation

- From where does it proceed? -3752-  
 From itself.  
 - I don't understand...?  
 That is understandable, because human consciousness does not recognize them.  
 - Where and how then are they recognized?  
 In The Book of Light.  
 - How was the situation on globe A First Round?  
 Actually there are 12 globes of earth chain, but the upper 5 are super-spiritual, so we leave them for now and move to the lower seven, which have worlds in manifestation, from globe A-6.  
 - Are the globes there from beginning of the round?  
 No. It began over 2 billion years ago. From the dying moon came over a sleeping sphere.  
 - That sphere was or became globe A of the earth-chain?  
 Yes, because it was prior to that, globe A of the moon chain.  
 - By what was that sphere activated?  
 By the monadic life wave switching from moon chain.

Therefore: To use the term "closed system" to INFINITY is indeed a poorly chosen term. But find me another one!  
 - I can't!  
 Then use it wisely. Because the same remark applies to all entropy.  
 - What is that?  
 Scientific speculation.  
 - So the idea or theory of "closed system" as presented by science is wrong?  
 It sure is. It applies only to "closed systems", limited by time and space, and vanishes then. It is like a clock winding down, not able to wind itself up again.  
 - So what is a "closed system" really?  
 A system of SECOND order, because its energy always derives from another, IT ENCLOSING system.  
 - Oh Great One, now I understand!!  
 There is only one really and truly closed system... NIRVANA!?  
 O.M.  
 Other than that there are systems within systems.

- What does science not understand?  
 That there is no dead matter! Whatever you see is the state of consciousness of a living being!  
 - That includes stones and plants?  
 Yes, everything!  
 - What does therefore B.O.L. teach further in that matter?  
 Every such "closed system" as science names it, be it universe, galaxy, solar system, sun, planet, etc. etc. IS AN INDIVIDUAL! IT IS ALIVE!  
 Wake up, ye confused scientists. OPEN UP YOUR "closed systems" of thinking!  
**EVERYTHING IS ALIVE!**  
 Even a stone, car, house, spoon, fork, carpet, book, knife, hat, dress, paper, pen, etc. YOU name it and... IT IS ALIVE!  
 Wake up from your materialistic dream, ye dreamers!!  
 - Is the B.O.L. pantheistic?  
 Let's define Pantheism first.

ABOUT "GOD"! -3755-  
 It is the teaching that there is a divine essence behind and within all beings. From it the entire universe flows forth and back.  
 But such view degenerated into, or led to, Christian view, that god is "infinitely" or a person. But infinity can't be a person, since person implies limitation. On the other hand the Christian god is known as being "without body parts, or passion."  
 - So what is god?  
 When in manifestation, the Supreme. In its higher aspect that from which the world emanates and into which it emerges again: NIRVANA. That is the highest principle. Everything else is impermanent illusion, O.M.  
 - We are in the 4th earth round 3 and 1/2 to come until the 7th. What will happen in the 7th?  
 Having reached the seventh, earth will project its life essences into laya centers.

-3756-

In order to form the future child of earth-chain.

- What will happen to our earth then?

It will become the moon of its (future) child. As the moon is dead now, our earth will be dead then.

- and then?

disappear in ether.

- But what remains to form the new chain?

- Life atoms. They rejoin to form the new planet and its chain.

In the same way after your death the life atoms of your body will rejoin again and form karmically your new body...

- How does nature work?

Nature repeats herself, but no two processes are identical.

- So in my body are the identical atoms from past life?

yes. And the same atoms will form your body in next life. \*life-atoms

-3757-

- Then there is no real growth?

yes there is, because the atoms or vayas always anew according to your state of consciousness.

- So even when tomorrow the earth with everything on and in it explodes, the life atoms remain?

yes. Only at Mahapralaya they are absorbed again in NIRVANA to reappear again next Mahamanvantara. OM

- So cosmic nature is an organic entity?

yes.

- What is the Zodiac in that connection?

Each globe of our chain and each of the 12 sacred planets are linked to the Zodiac.

- Please name the 12 sacred planets and their connection to Zodiac. \* even after atomic explosion.

-3758-

Sun-Leo, Jupiter-sagittarius, Venus-libra, Saturn-Capricorn, Mercury-Virgo, Mars-scorpio, Moon-Cancer. Now the 5 higher:

Jupiter-pisces, Venus-Taurus, Saturn-Aquarius, Mercury-gemini, Mars-aries.

- Some planets repeat themselves? Visible orbs furnish mankind with outward and inward characteristics. Upper globes are their reports with our Monads and spiritual faculties.

- can I touch a planet with my thought?

yes. The manas rupa then expands until to that planet.

- Do Neptune and Uranus belong to the 12 sacred planets?

-3759-

No. Uranus belongs to universal Solar System, is an integral part of it.

- So Neptune originates in this solar manvantara?

No. Neptune was captured, like atoms sometimes capture electrons of other atoms. In the same manner the cosmic electron Neptune was captured into our solar manvantara. Neptune is a captured comet or former comet.

- Neptune was a comet?

So was earth and every other planet. All comets are first stage of planetary evolution.

- of suns too?

yes, because there are planetary comets

- what about Encke's comet?

-3760-

Belongs, if still existing, to our solar system.

- What about the paths of such comets around the sun?

Ellipses shall tend to become more circular.

- What happens then to those comets?

They 1.) are either captured by the sun and destroyed or 2.) they settle as planets (survival of the fittest.)

- What is this first settlement as a planet?

A condition preceding the first planetary round.

- Embodiments of what?

Of former planetary chains, returning now to a new manvantaric course in the solar system.

- Is Neptune connected with the 12 houses of our Zodiac?

No, because Neptune is a capture. = ellipses.

-3761-

- Is there separation of the individual from divinity? <sup>wisdom</sup> ~~misunderstanding~~

No. And that led to loss of occult truth, now reawakened in B.O.L.

We are all one but individually different in evolution.

- What are the pods to us?

Their destiny is ours.

- What is SPIRIT?

It is the summit, the seed or noumenon of any hierarchy in the universe.

- What is matter and substance?

It is the EXPRESSION of spirit, radiating downwards, revealing the hierarchies.

- I don't understand.

Spirit is something that has inherent spontaneously arising energies you can use them or not.

- So I am NOT that spirit?

No. You are the MONAD, but IN YOU in your spirit arise those desires and energies.

- Buddha overcame them?

OM

- So spirit is the primal source of...

-3762-

- Are the mānasa putras our higher selves?

Not at once, they are the growing in our higher selves, therefore they are not our HIGHEST SELVES. Solve the riddle.

- Where and when did the Mānasa putras incarnate in mankind?

These Mānasa putras or Dhyanis incarnated primarily in the 3rd Root-Race on Earth in this Round many millions of years ago in the Third Root-Race on this planet.

They saved us.

- From what?

From AEONS of animality and unspeakable degradation and from ages of wandering on a painful dark path. Keep the rule unbroken, follow the right hand path.

- What would be the left hand path?

Most of mankind follow it now by wiles and guile and IMMORALITY of many kinds.

- Where are they from, the Mānasa putras?

They derive from the "Hierarchy of Compassion". They have COMPASSION.

-3763-

With us they are our part and sometimes all of them as Manas or mind. OM to the Mānasa putras.

They derive from the light-side of Nature. Were it not because of them we would still crawl like apes - why, although we did NOT derive from apes!

- So the Mānasa putras are our higher nature?

Yes. They, as spiritual beings, guided our ego.

- Are they more evolved than us?

OF COURSE! Is the teacher mentally more evolved than the student? Of course.

- How did the Mānasa putras guide us from their cosmic spheres?

In the same way as you light with just ONE lighted candle many candles.

- I did not yet understand Anupapā dāca-tattva?

It means "parentless".

- Yes, but how can it then still have source or origin?

It is itself the primal seed of individuality.

-3764-

- Where did it spring into final manifestation?  
In this particular hierarchy.

- To what can it be compared?  
to the entrance of monads into man.

- To what led it?  
To self-consciousness and individuality.

- I thought a child gets it from his parents?  
No, we all, all mankind received it from the Mānasa putras.

- What is the plane below the 2nd Lops?  
It is the plane of the gods, of those who gave us mind.

- So they are the gods?  
Yes and therefore (besides of the Mānasa in us) WE are gods!

- What is our destiny?  
Either NIRVĀNA or to become conscious coworkers with nature.

- In which way coworkers?  
We will bowly evolve into Mānasa putras of future manifestations.

-3765-

- What were we in former Manifestations?  
Monads in a still lower state of evolution, forming then the vehicles of whom?  
Of those who are still ahead of us.

- They now still work through us?  
Yes, through our higher and our personal egos.

- Why?  
In order to inspire us to progress upwards.

- They are our inner gods!  
Yes, our very selves, but still different.

- What is the goal of evolution?  
To raise the personal into the impersonal, the mortal into the immortal, the beast into man, the man into a god and higher.

- There is something higher than god?  
Than a god in manifestation, yes. It would be one who is detached from all planes of manifestation.

-3766-

- What is important?  
To bring the within without.

- Please explain evolution to me.  
It is the Monad beginning its journey in material world by leaving the cosmic source of all, driven by desire.

- Into what direction?  
towards divinity.

- What constitutes the process of evolution?  
It is developing from an un-self-conscious god to a self-conscious god. Evolution is the unfolding of the potentialities and capacities of the divine seed.

- So the spiritual essence is the realm from which evolution starts?  
Yes, and that path continues down into matter.

Then what?  
Then the monad rises again towards divinity. That is evolution.

- Is it one monad or a monadic essence?  
A HOST or ARMY, composed of individual monads, passes into evolution.

-3767-

- What happens during the higher states of evolution?  
One feels more and more at one with everyone else.  
Evolution is when the hierarchy of the human being grows the self as its seed.

- How many evolutionary stages?  
10. And on each of them the "travelling monads" surround themselves with material vehicles, or rather first with immaterial compared to ours.

- I don't understand.  
Evolution starts always on the arūpa plane. That plane is immaterial.

- How many immaterial planes? ...  
3. Then ethereal until down to the physical.

- Does that count with all evolution, beginning with the so-called "Bij Bang"?  
Yes. Prior to our physical evolution there was a transparent ethereal evolution.

-3768-

-So the three upper vehicles are made of...?  
LIGHT, which is arūpa, compared to matter as we know it.

- Explain please evolution and its order.

1. The Self, divine entity or Monad
2. The Ego growing from within.
3. Ego throws out from itself its
4. Sūl as garment (ethereal, astral)

- Is that what we call the soul of any man?  
yes. Man has many souls, and he has many egos.

- What is behind or back of them all?  
The deathless flame, the Monad.

- What is Swābhāva in connection with evolution?  
Evolution brings out the Swābhāva, the latent capacities, of the divine seed.

- The individual characteristics, the essence of the Monad?  
yes.

-3769-

- What is the ENTIRE effort of evolution?  
Not only to bring out what is within the monad, but also that the monad should gather up from the matter in which it works something else.

- What is that?  
Other less progressed entities, gathering them, so that they be part of the monad, the evolving monad.

- Carrying all of them along with the monad evolutionary up and back to the source?

OM. See the book of Light as a divine monad, gathering up all back to the light. Thus the goal of manvantaric evolution is, to raise the mortal into immortality. OM.

- What are atoms?  
Emanations of the soul, in which the soul enclothes itself in order to evolve.

- What is the misunderstanding of science, concerning evolution?

-3770-

Science limits evolution to the physical world.

- What is the vehicular side of the universe?  
The elements of Kosmos.  
What do they form?  
The vehicular side, or the beam or carrier side.  
What forms the energy-consciousness side?  
The principles.

Please instruct me as to the cosmic planes?  
So be it. The cosmic planes are but the garment of the Divine.

- Why are they so imperfect?  
Because built by imperfect, evolving hierarchies.

- Is that, what Goethe meant, when he said: "Thus, at the roaring loom of Time I ply, and weave for God the garment thou see'st Him by."?

yes. Or as Paul, the Christian, says: "For if we live and move and have our being."

- Was Paul an initiate?  
yes, the true Paul yes.

-3771-

- What are the elements of Kosmos for the consciousness-side?  
They have 7 principles working through them. As to consciousness, the 7 are consciousness on one hand - vehicle on the other.

And from the substantial side?  
Force on one hand, matter on the other.

- How are they in a diagram?  
3 upper, then the archetypal, intellectual, astral (formative) and physical world. See them as rungs of a ladder, as diagram only symbolically.

- I don't understand.?  
They are within each other.

- Where is the most spiritual?  
It is the innermost.

- What is beyond the archetypal world?  
It is laya, the Nirvāya of all things lower than it. OM.

- What springs from it?  
Cosmic seeds, sending forth hosts of hierarchical beings, emanating or bringing forth on the downward scale other lower hosts.

- How else could this be explained or presented?  
By triangles. <sup>below the Δ</sup> the two lower planes are the lower cosmic planes as explained. 

-3772-

- which globes of our chain belong to the  
 exodetic world?  
 A + G. B and F = intellectual world,  
 C and A = astral world, D = physical  
 world (visible planet Earth).  
 - So there are 2 globes on each plane, ex-  
 cept globe D on our plane?  
 Yes.  
 - But didn't the ancients speak of  
 four elements?  
 B.O.L. reveals more. Besides: the an-  
 cients didn't necessarily mean earth by  
 earth.  
 - I don't understand?  
 When the ancients said earth, they often  
 meant "cosmic matter" as lowest elements  
 of all. Example: Water represented  
 chaos, or "waters of space". Wind was  
 they really meant as "spirit". Latin re-  
 veals it. "spiritus" means "breath,  
 wind." Atman is Sanskrit term, mean-  
 ing spirit, but "at" means "breath...  
 - what about the meaning of "fine" when  
 the ancients said it?  
 It is symbolically for "divine light", first  
 emanation of cosmic logos.  
 Daivi Prakriti?  
 O.M. Divine nature. That is the FIRST  
 process = 1st emanation beginning evolution,  
 leaving NIRVANA.

-3773-

- I would like to know more about the visible  
 planet earth I live on. What is it really?  
 Not the best of all possible worlds.  
 - Why?  
 If that would be the best we can receive  
 and achieve, it would be a shame and not  
 worth living.  
 - Why is it not better as it is?  
 Because of us. WE made it, and no-  
 one else.  
 - We?  
 Yes. OUR KARMA drove us to it, and  
 we are largely responsible for this  
 earth and life as it is!  
 - So Einstein was right, everything is  
 relative?  
 Yes. But others knew it before him.  
 - Everything is relative, in the sense that  
 there are no absolutes. Everything  
 intermingles with everything else.  
 - What if there were an absolute?  
 Then there would be no growth possible,  
 no development, everything would be  
 but a clump of inert matter.  
 - I would like to know more about  
 the age of earth. Is it older than Mars?  
 No.

-3774-

- But science! It teaches so!  
 They say a lot, B.O.L. teaches diffe-  
 rently.  
 - Please explain?  
 Science concludes that Mars is older  
 than Earth. That is wrong.  
 - Why do they think it is older?  
 Because they see through their micro-  
 scopes and telescopes no sign of ve-  
 getable life on Mars, also no sign of other  
 life. So they think Mars is dead.  
 - Somewhat like the moon?  
 Yes.  
 - So is Mars younger?  
 It depends what you mean by young or  
 old. Remember, that a planet is the li-  
 ving body of a living being.  
 B.O.L. teaches: Mars is younger than  
 earth, meaning that the BODY of  
 the planetary spirit of Mars is  
 younger, than that of the earth.  
 Give you an example: A child can  
 be further advanced than its parent  
 but or although younger.  
 - In what state is Mars?  
 In a state of planetary "obscuration".

-3775-

- Mars is asleep?  
 Yes. Or more than asleep.  
 - Why more?  
 Because its hosts or living beings  
 have left Mars.  
 - Why?  
 They went to higher planes of the  
 Mars chain - to higher globes.  
 - So then there is no life on Mars?  
 Yes there is. When you sleep, are you  
 still alive? Even in deep sleep?  
 - Yes I am.  
 You are, because there are still vital  
 processes going on in your sleeping  
 body.  
 - What happens at sleep?  
 For instance strengthening of the  
 bonds connecting physical with astral  
 body.  
 - Is there more left on Mars?  
 Sistas are still on Mars.  
 - What is that?  
 Beings whose "job" it is to keep the  
 seeds of life on Mars.  
 - Why?  
 So that the incoming flow of the retur-  
 ning life wave of Mars shall find these

-3776-

- seeds in order to evolve higher. DM.
- How many Sishas are there?  
Seven kind of Sishas. Elemental, then mineral, plant and beast Sishas.
  - And the humans?  
Well, the best type REPRESENTED the human type on Mars. But there are more types of Sishas on Mars.
  - What are they?  
They were HIGHER than the average of mass humanity at the point of Mars-observation.
  - What is the function of the higher Sishas?  
They are there in order to provide appropriate vehicles for the more evolved humanity, coming down from its vehicle.
  - So Sishas are left behind on a planet, when observing, so they can serve as seeds of life for the inflow of life wave at the next manvantava?  
DM.
  - What about Venus and Mercury?  
Venus is in its last round. Mercury is beginning its last round.
  - Which round has Mars ended?  
Its 3rd round.
  - Back to Earth. They say Blavatsky taught in Secret Doctrine, that we came to Earth from Mars...  
\* of its 7th. \*\* its 7th

-3777-

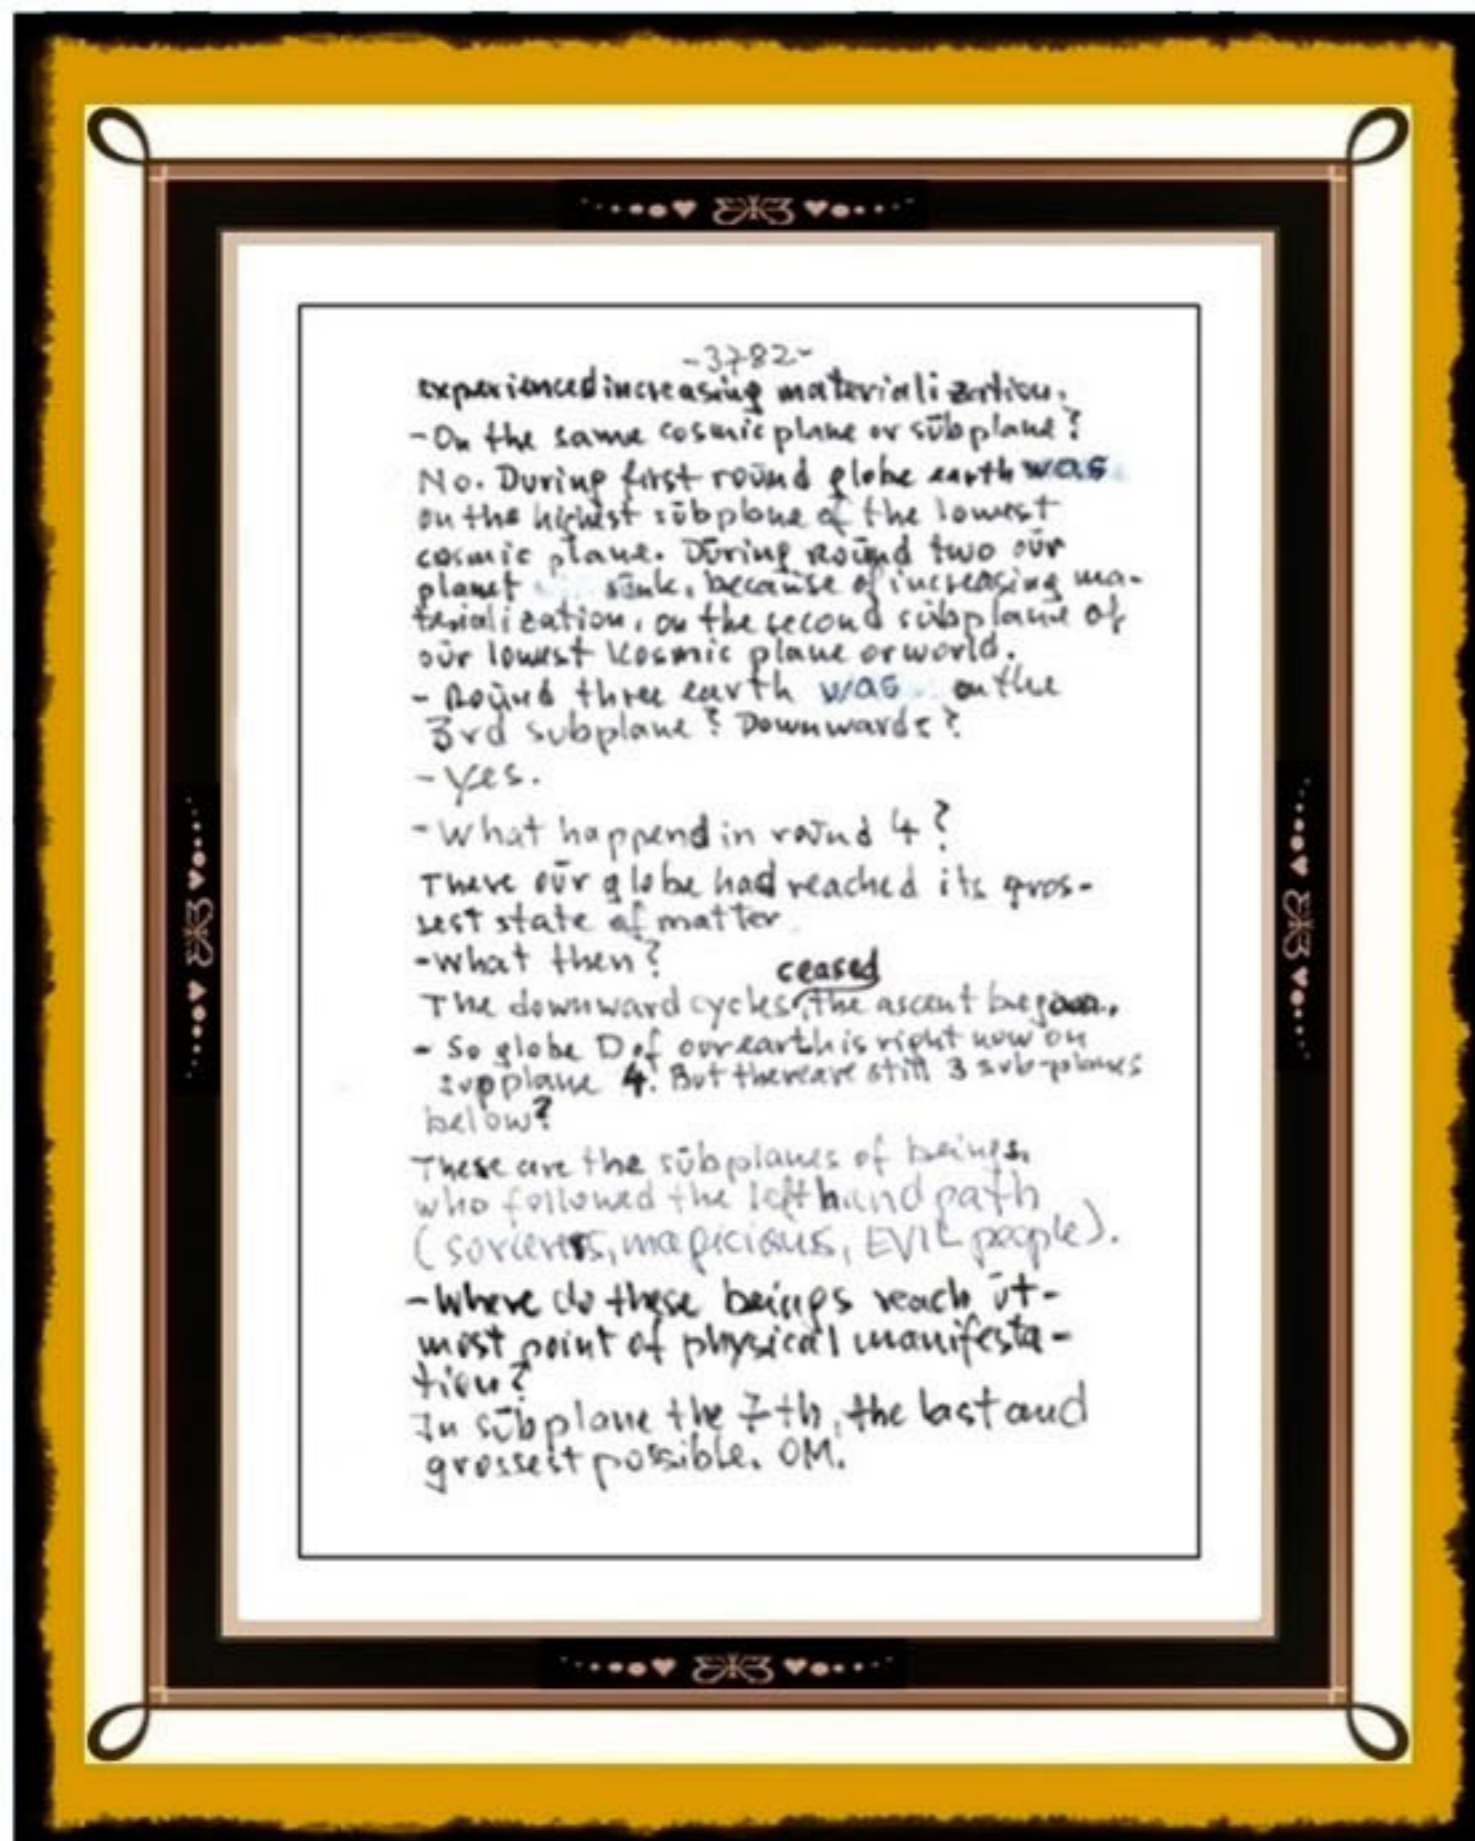

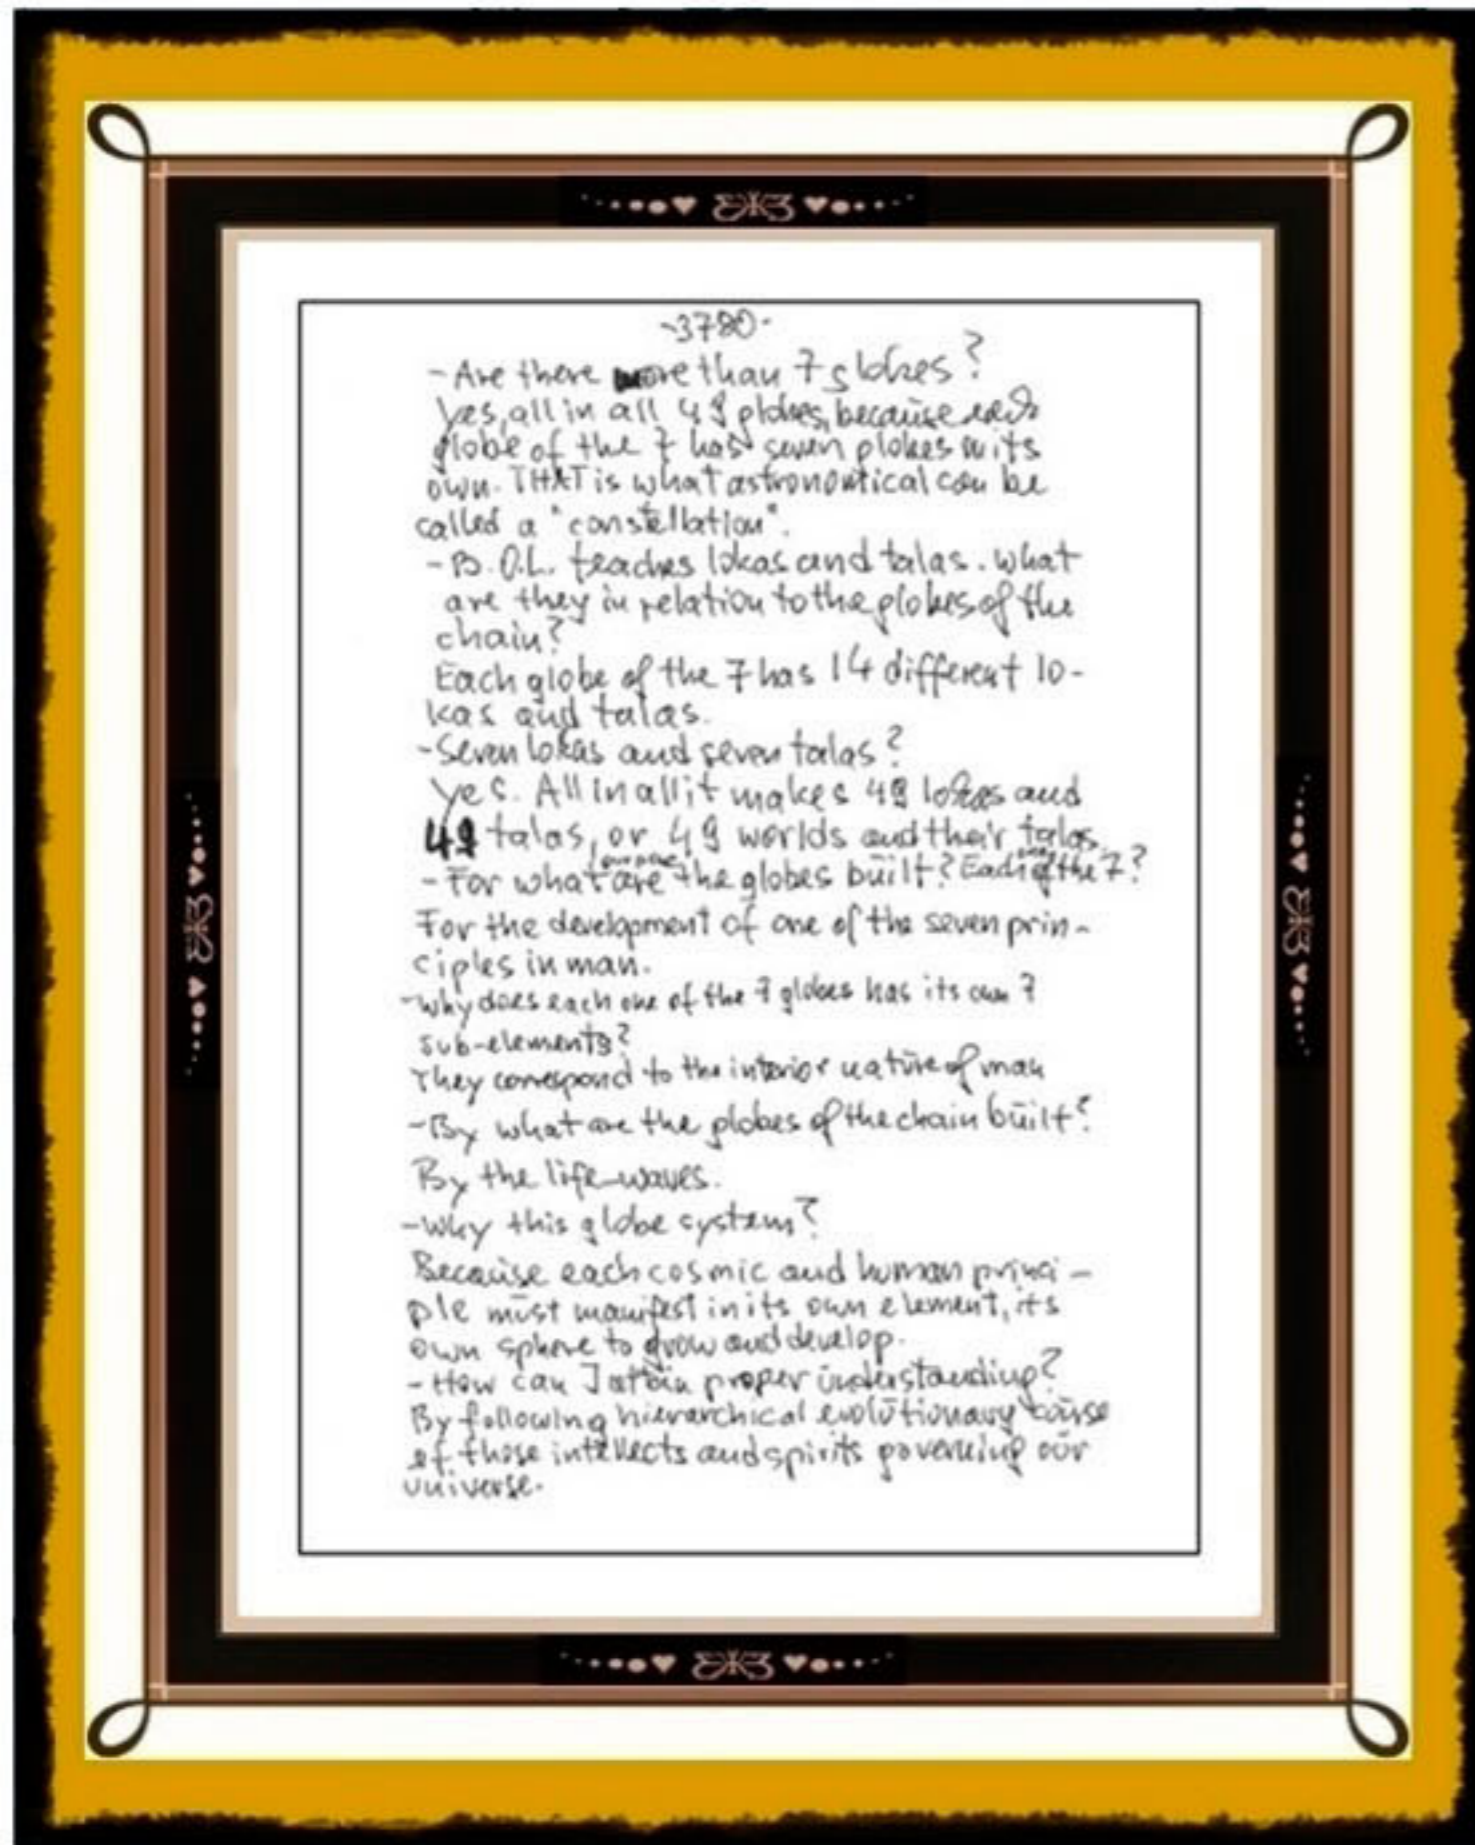

- So in the next manvantava we go to Mercury?
- That is utterly wrong. Listen and learn!
  - Again please. Mercury is in 7th round, earth is fourth and Mars has ended its 3rd round. Correct?
  - I did not yet understand "spiritually younger".  
Physically the planets farther from the sun are younger, than those nearer to the sun, but they are not necessarily SPIRITUALLY younger. That concerns the planetary monad itself.
  - Why is it so hard for my mind to understand?  
Because it is matter-built, and we deal here with SPIRITUAL subjects and facts.
  - Hence the confusion of a Mr. Sennett, for example?  
Yes, which led up to denial of their own teachers.

-3778-

- I shall go later in to the "Simmetta-trowsa".
- Back to earth. Where does earth's heat come from? From the sun?  
Not all of it, just little of it.
  - I don't understand.  
70% or more of the earth's heat derives or is produced from earth itself. About 30% from the sun.
  - By direct radiation from the sun?  
No, not by physical radiation, but rather by electric currents flowing from the sun.
  - What about electric phenomena?  
THEY are the main outer cause of storms etc. It is an interaction between Earth prana and the meteoric continuum surrounding our planet.
  - The same continent science discovered not long ago?  
Yes, and it is the same continent taught in B.O.L. since over 20 years. They could have saved a

-3779-

- lot of money just by reading B.O.L.
- How does that thick veil of meteoric dust function, for what purpose?  
It acts like a cushion, protecting the planet.
  - Why has Mars not such veil (acc. to B.O.L.)?  
Because vital essence of Mars has left Mars physical globe up to the other globes.
  - What is Earth?  
Embodiment of lowest prakriti and material copy of the highest globe. DM.
  - When will earth vanish?  
In about 2 billion years from now the entire chain will vanish and earth will become the moon of its successor planet.
  - Please instruct me more to the teaching about planetary chains.  
Each visible planet is one of six TOUS invisible, invisible globes. The seven form what B.O.L. teaches as or calls a planetary chain.

- Immediately? -3794-

No, but after long planetary Nirvāya.

- When did all this begin?

About 2 billion years ago, approximately 007 earth cycles. We are now in the ascending part, OM.

- This process repeats itself during the rounds?

Yes. And now we are in round 4th of globe D.

- On which plane are we now?

On the 4th subplane of the 7th lowest cosmic plane. So the life-wave passes during each planetary round through the 7 globes of the chain, from cosmic plane to cosmic plane.

- Through all subplanes during a round?

No, but through only ONE sub-plane of each cosmic plane during each one round. OM.

- What is the result of this activity?

During the 7 rounds the life-wave passes through 49 sub-planes.

- Why?

So that the beings, composing the life-wave have the chance to work out their karma.

- I UNDERSTAND. It is initiation!!?

Yes. The Monad can only become a being, when it IS that being, be it stone, plant, animal, man or angel, etc.

- So up to how we WERE already stone,

-3785-

plant, animal and human?

So it is. OM.

- Is there an analogy between birth of man and of a chain?

Yes. Read and learn. First of all: It is THE SEVEN SACRED PLANETS, who build, govern and overlook, the seven globes of our earth chain.

- What sacred planet builds globe A of earth chain?

It is the sun, BUT the sun is subject to the SWARITVA of globe A of earth chain. A worker or rather an architect can only work with the material at hand and is therefore "subject" to that material.

- So the globe or rather its indwelling Spirit had its own will too?

Yes.

- B.O.L. teaches VULCAN builds globe A of earth chain ...

That is true and highly occult, and it shows that you really READ B.O.L. The sun is SUBSTITUTE planet for Vulcan. About that later more.

- What planet built globe B of earth chain?

Jupiter did. And Venus built globe C. Now YOU tell me: which sacred

the sun

-3786-

planet built globe D (our earth)?

- Saturn?

Yes. Globe E was built by Mercury, globe F by Mars, globe G by the origin of moon.

- Origin?

Moon is but a substitute planet, an extensive enumerative substitute. About that later more.

- So the sacred planets are world builders of our planetary chain?

Yes, you may also call them Kosmoconstructors, but they always built the chain PLUS, or using, the material and the swabhāvic impulses.

- From where did these impulses emanate?

From the chain itself.

- Can it be compared to the birth of a child?

Yes.

- In which way?

A child has its own individuality, its own vitality, personality and desire for life, just like a planetary chain has. And like that planetary chain, a child is born in an environment, which nevertheless molds and influences the child, as it happens with planetary chain.

-3787-

- With what result?

It directs - like with the chain - the way and manner in which the now and further body of the child develops.

- Everything is under the law of analogy!?

Yes. Nature works in SIMPLE ways, using less effort. OM. So actually the birth of a chain, a planetary chain, is analogous to the birth of a child. OM.

- What about the development of the child IN UTERO?

That too is analogous to the building of a planetary chain. As man reincarnates in houses of flesh (bodies), so planets reincarnate or rather re-embody in new planets.

- But in utero...?

As the human seed grows inside the womb, becomes an embryo and then is born, so with a planet and its chain.

- What is the womb of the planetary chain?

Cosmos itself.

- The planetary chain is under guidance of Chohans. Can you name them, or rather to which class do they belong?

You may also call them Dhyāni Buddhas.

-3788-

Let me be more precise: There are Architects and Builders of the chain, as there are architects and builders of houses or other buildings on earth.

- So two general lines or hierarchies brought forth our planetary chain?

Yes. The architects (spiritual beings) form the higher and more spiritual side of the planetary chain.

- For example?

The luminous arc.

- What is the luminous arc?

That arc on which we will ascend now back to the source.

- How long on that arc?

For the end of the kalpa about  $3\frac{1}{2}$  more rounds or about 2 billion years to come.

- So the luminous arc is a path built by the architects?

Yes. Without it we could not cycle upwards.

- In that process the higher leaves its sphere?

No. Neither by descending nor by ascending. The spheres always remain. More of it later.

-3789-

- Who formed the shadowy arc?  
The Builders (constructors of the chain). The shadowy arc, as you know, enables the descent of the life-waves.

- down into matter?

Yes, and growing grosser with each descent on that "shadowy arc". But as you know we have surpassed the point of descension and are on the upward path on the luminous arc. OM.

- Are Mars and Mercury part of our planetary chain?

That is what Sinnett thought. But so they are not.

- How could it have come to the mis-understanding of Sinnett, concerning Earth's Planetary chain. B. O. L. teaches that Sinnett was taught by THE MASTERS PERSONALLY.

- Right. And they indeed TAUGHT him a lesson. For instance not to want to be smarter than a master.

- Explain please.

The teaching is clear. The masters teach:

There is a relation of Mars, Mercury and "the four secret planets" to our Earth.

-3790-

- The fourth aspect is earth?

Yes. Now Sinnett asked the master personally: "What other planets of those known to ordinary science, besides Mercury, belong to our system of worlds?"

- A clear question...

Yes, but pay attention to the last four words of that question being "...our system of worlds."

Now Sinnett continues to ask: "Are the more spiritual planets - (A, B and Y, Z) - visible bodies in the sky, or are all those known to astronomy of the more material sort?"

- Of course A, B, Y and Z are invisible to us.

Yes, but Sinnett was confused, because he did not understand the difference between our earth chain and the esoteric solar-system chain.

- What is the difference?

Our planetary chain consists of A, B, C, D (earth), F and G. Earth is in that chain the only visible globe.

- And in the esoteric chain?

There are 3 visible globes and 4 invisible.

-3791-

Globe A, B, Mars, Earth, Mercury, Y and Z. But each of those globes have of course six counter-globes.

- Y, Z, A and B are invisible?

Yes.

- Now I understand, Sinnett thought, that is our earth chain with Mars and Mercury as parts of it?

You got it. So Sinnett said that BLAVATSKY'S teaching was wrong.

- What was the lesson, the Masters taught him?

The lesson was LEARN AND STUDY before you criticize the teacher!

- I have questions as to the Moon(s).  
Ask me.

- Why did Hermes call the moon

- Why was Hermes called in India "The Son of Soma" and the "Moon"?

That has to do with the teaching of mysteries of Initiation. You will understand after having read B. O. L.

many times.

-3792-

- wait please before we talk about the moon, let me ask you about immortality.  
Ask.  
- Is immortality conditional?  
Yes. Immortality is NOT unconditional.  
- Why?  
What arises must pass away, but...  
- But?  
Buddha said: "Brothers, all that is, is composite and transitory. Therefore work out your own salvation."  
- When then can immortality be assured?  
When the central principles, composing the intellectual-intuitional man, have risen.  
- How high?  
Up to the monadic plane, one with the monad, enlightening them.  
- Is that the experience of NIKVĀNA, while still in the physical body?  
Yes.  
- How can I attain it?  
Read DIVINE MESSAGE FROM THE TRUE GOD.  
- The lower must obtain the ability of the higher?

-3793-

yes.  
- What is it?  
Absence of desire for all planes lower than that of the Monad. You still want something? That makes you mortal.  
- What if I WANT immortality?  
You can't want something that you're in essence one. All there is to do: LET GO and study detached. OM.  
- When will I experience "monadic disconnection"?  
When you say: "Evil, be thou my god!" BUT you are not in danger of that. You are safe from a vīchi Nirvāna. So walk amrita yāna.  
- What is that?  
The path to immortality, which is also the path to achievement of an immortal vehicle, which is NOT a body but the ability to be FULLY CONSCIOUS, switching from one birth to the next.  
- Is that a Pratyeka?  
In a sense yes. About that later.  
- What is the aim of evolution?  
To raise the mortal into the immortal.  
OM.  
- OM!

-3794-

- What is the moon?  
our cosmogonic mother. the lowest hierarchy or rather plane of being comes from the moon onto earth.  
- Where does the intellectual come from?  
That is the middle, manasic part. It comes from the sun.  
- And the highest part?  
of course from the monad. Attain through B. O. L. a correct understanding of interconnection, inter-working of the 3 separate parts: how they function in you, and you will be free of suffering because understand your future.  
- So what is the moon?  
- The kāma rīpa or dissolving DESIRE aspect of a once functioning planet. That corpse decaying actual aspect works on us, or rather on our actual bodies, and urges many to do evil.  
- Is that the reason why the crime-rate rises at full moon?  
OM.  
- Are there two moons?  
Yes. But that "second moon" is almost invisible...

-3795-

- B. O. L. teaches moon as "vampirizing shell."  
Yes. But the present moon is not the real moon. The real moon had life as it, like now is on earth, just a few evolutionary steps backwards.  
- What is that globe now, that we see at night?  
It is the kāma rīpa of the former alive planet, its corpse, its shell. Our EARTH grew from it.  
- Still?  
Yes, and that is sometimes worse for you than for wheel.  
- What procedure?  
Our Earth, which grew from the moon, draws still parts of lunar life-essence...  
- Why the B. O. L. ?  
Occult teaching has degenerated. Very few teachers, like Mahatma Dr. Gimm, and Prof. Pürüder\* held the teaching high and pure. B. O. L. is the accomplishment of pure occultism. OM.  
- What is B. O. L. ?  
Pristine Purity, dating from midpoint of the Fourth Root-Race (Atlantean) and Beatrice Fleming.

-3786-

and further back in time.  
-Why was B.O.L. widowed for so long?  
Now mankind is slowly ready for B.O.L.  
We were in the age of aequa Aquarius,  
the age of knowledge. THEN we still  
were in age of pisces, the age of believers.  
-It still don't understand fully the science  
of the spheres...?

Because you haven't yet brought the  
spheres in correct connection with the  
races.

-What does the doctrine of the spheres  
comprise?

The doctrine of planetary chains is a part  
of it.

-I begin to understand doctrine of the  
planetary chains.

They are ready for the next step.

Ask me.

-What includes doctrine of spheres?  
Doctrines of origin, life, destiny of all planets  
including the sun, all that which is part of and  
composes our universal solar system.

-What is that?

What Sinnett did not understand, but  
also those planets INVISIBLE and their

-3786a-

inhabitants. DM.

-Can you name another similarity between  
planetary chain evolution and humans?  
Cell division. One cell casts off a new one  
and the old one dies. One planet casts off  
a new one and the other planet dies.

-That brings us to reproduction. Humans  
will reproduce in future a-sexually?

Yes. The sexual reproduction was never meant  
for humans but for the animal world.

-Do you suggest celibacy?

That is B.O.L. teaching. Yes.  
Because it has primarily to do with the  
descent of spirit into matter, including  
the struggle of spirit to REASCEND.

-Explain please.

B.O.L. points towards the effect of  
sexual morality on the culture and  
healthiness of humans. Glory to  
THE BOOK OF LIGHT, being far-seeing  
and morally beneficent. DM.

-DM. What is a grihesta?

It is a family man in Brahmin times,  
who broke married life after begetting  
his son.

-And then?

Became chaste yogi.

-3787-

-So being chaste leads to spiritual AND  
physical healthiness?

Yes.

-Is that the reason, why in countries, in-  
fluenced by the lethal influence of Islam  
and Christianity, we find finest races, phy-  
sically and spiritually and mentally?  
Concerning also stature and physical  
strength?

Yes.

-What are creative powers in man?

The gift of divine wisdom. A completely  
chaste person, though, does not need even  
to be creative anymore. It is or will  
be a full blown god!

-So we abided that creative power by  
directing Kundalini down the spine, and  
having - or fallen into - sexual activity?  
Only mindless animals do that in their  
proper ways, or rather seasons.

-Then why do humans have sex?

They waste their life - excuse to  
gratify their bestial desires.

-What is the remedy against immorality?

Mamafe, because it directs away from  
the sexual urge into other activities (job, house,  
caring for the children, etc.). In any case

-3788-

B.O.L. teaches: 'sex is a passing phase in  
human evolution. Soon we will reproduce  
and reproduce a-sexually. Those who can't  
overcome their sexual urges will fall back  
in evolution and will pay a painful price  
by repeating the class, or "round".

-Can't I have sex and become enlightened?

It would take much longer. Better transfer  
Kundalini by studying B.O.L. and in  
some future lives you may attain enlighten-  
ment and liberation.

-What bruised the seed of the fruit of  
wisdom and knowledge?

The seed of lust did.

-How?

In turning the holy mystery of procreation  
into animal gratification.

-Is that why Karma fell so heavy on the  
atlantean race?

Yes. That is why once, the holy man became  
the helpless, scrofulous, diseased but  
also most conceivably and intelligent bestial  
of all animals!

-We are now in the Fourth round, just  
past the midpoint, but on the ascending wave?

Yes, and that is why in very distant past  
man will be more spiritual and less depe-

-3799-

weate than now.

- why are free animals mostly never sick?
- Because they course their sexual energy, and lose it only during procreation-seasons.
- To what will B.O.L. lead us?
- To a pure race of Christs and Buddhas, last but when he return from sexual to asexual reproduction.
- Should a pregnant woman have sex during pregnancy?
- NO. Celibacy during pregnancy will create a pure environment for the developing fetus, leading to innocence and pure environment for the growing child or infant.
- Also should the pregnant woman read SPIRITUAL literature.
- What is the result of unnatural living?
- Disease and misery.
- But we must eat, drink and have sex...
- But EXCESS to all that leads to disease, misery, suffering mental and physical. And what is worse: You transmit it to future generation.
- Shouldn't we love for others, love them?
- Yes, BUT when connected or combined with ambition, you may become a glutton, de baiches, a ty rant, and thus you make yourself and others sick, spiritually and physically.

-3800-

- So no god is to blame?
- Just you. Noone else.
- Can't an evil person without wanting to become good, study B.O.L. too?
- It would attract all demons to him, if he studied B.O.L. to indulge even more in immoral life.
- What are incubi and succubi?
- Demons.
- Can they urge us to have sex with them?
- Yes, it is astrally possible. B.O.L. calls it: Sex between living man and the beings of the Elemental world. It leads to Epilepsy and total insanity. Lust is the "food" for astral demons. Mediums are in great danger to be "demanded" by those demons.
- They enjoy (sorceners) lustful animal feelings by working black magic upon themselves?
- Yes.
- B.O.L. teaches that "woman should be the lady of the lord," the husband to be obedient to his wife."
- Yes. Because chastity is meant by that, and thus he uses spiritual power of the woman, by being close WITH HER.

-3801-

- Is that how alchemists produced costly elixir of life and philosopher's stone?
- Through sexual union?
- NO. That in turn leads to black magic and attraction of demons.
- Is that why alchemist took AFD women to help them?
- Yes! He called them "sisters" and used their spiritual presence to transform k\u00fcndelini, BUT NEVER SEXUALLY.
- When will the Master admit myself in his presence?
- Renounce all carnal commerce with women.
- What is the difference between a divine Titan (liberated man) and normal men?
- The liberated human is moved by altruism, the "normal" man by selfishness and egoism. That's how you learn...
- When will I become invulnerable in my personality, and immortal in my individuality?
- When every animal element is eliminated from your nature.
- What is the basis for spiritual development?
- Purity. OM.
- Please let us continue with the power of matter.
- Ask me.
- I still don't understand what matter is.

-3802-

- Matter is frozen light, or condensed light, or even condensed fire. The evidence: All matter burns when you apply to it the necessary temperature. In the same we can say, that nature is condensed divinity.
- When you say matter, do you also mean ethereal matter and substance?
- Yes, light is ethereal matter or substance.
- Please, teach me the relations and interactions of spirit, substance, force and matter!
- Ask.
- What is matter in comparison with force?
- Matter IS force!
- I don't understand.
- Matter is nothing but compressed and crystallized force.
- So force is also matter?
- In its 4th, 5th, 6th and 7th states.
- So force and matter are ONE?
- Yes.
- What is the storehouse of forces?
- The Sun. It is also the generator of forces, in ITSELF in its 1st and 2nd states and matter in its 6th and seventh states (counted upwards).
- Is that why B.O.L. calls the sun an "atom"?
- Yes. An atom in the 7th or highest degree of
