

AFTER DEATH STATES AND THE PROCESS OF REINCARNATION

Whatever you have become attached to during life on Earth in your physical body shall be taken away from you through a purgatory process during after death states and reincarnation. In order to understand what happens to us after death, why and how we reincarnate, we have directed our attention to the sevenfold nature of man. Every human being is made of one physical body and six auric bodies, all of them merging into each other. The auric bodies are visible to the eyes of a trained seer or through social photography, as well as a newly developed videotechnology.

The seven bodies or principles are:

- 7) **Physical body, stūla-sarīra** स्थूलरूप , container and expression of the six following bodies.
- 6) **Eteric body, prāna** प्राण vehicle of lifepower
- 5) **Astral body, linga sarīra** लिङ्गरूप , vehicle of emotions
- 4) **The animal soul body, kâma-rūpa** कामरूप ; animal desires
- 3) **Mental body, manas-rūpa** मनस्वरूप , thoughts high and low
- 2) **Human soul body, buddhi** बुद्धि , mental-spiritual energies
- 1) **Spirit body, âtman** आत्मन् , spiritual energies.

Each after death plane is sevenfold and made of emotionals, thoughts and spiritual aspirations of its inhabitants, be they demons, deceased humans or angels.

Oh, Lanoo, heaven and hell are man-made [about 14 Million B.C.; see THE BOOK OF LIGHT).

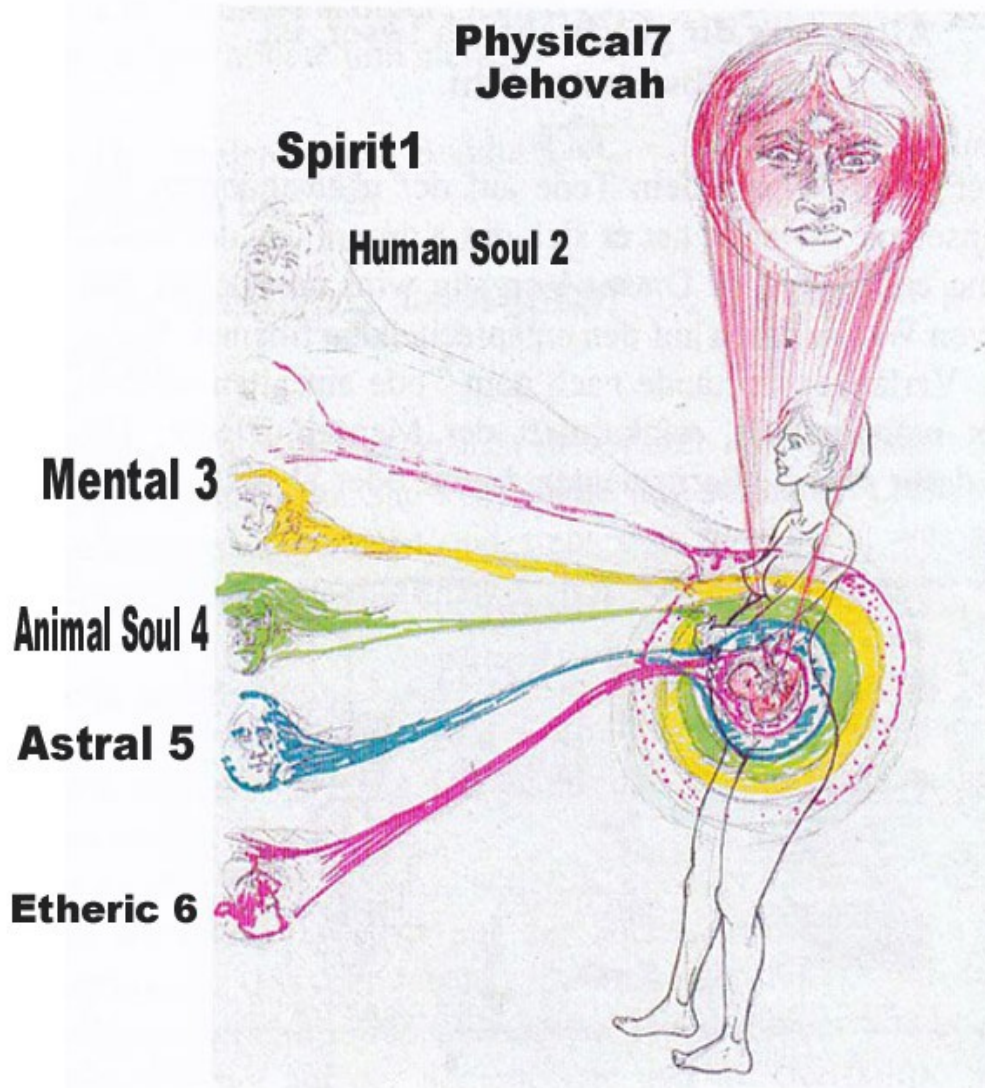

After death of the body, the person wakes up in the etheric body on the etheric plane, in the astral body on the emotional plane, in the animal soul body on the desire plane, in the mental body on the mental plane, in the soul body on the soul plane, in the spirit (Christ) body on the spiritual plane, and is purged on all planes from the energies created in the different bodies during Earthlife. The higher the plane the more pleasant the energies and effects to be outlived. Or: Good deeds or energies are outlived on higher after-death planes and cause a good reincarnation. Since most people have done good and bad deeds throughout their life on Earth, the after-death states and the new life are colored by both, good and bad events. This is why sometimes good things happen to bad people and bad things to good people.

Whenever a person awakes up after death on the next higher plane of consciousness, it has dropped the body from the plane below (A). After all desires have been outlived on all planes after death, the person reincarnates again. The reason for that are Permanent Atoms or Skandhas (B) स्कन्ध They contain the essence of the individual desire, generated during the person's life, and are deposited on each plane. These Permanent Atoms pull the person back from inside-outside from center to circumference into reincarnation (C) The lower the after-death state in some hell, the more unpleasant the purgatory, because the person is confronted with all remaining and still raging desires, but now without a physical body to satisfy them. That is why the Buddha urges his disciples to "die before you die". It spares you a lot of suffering after death....

In any case: if you want to prevent reincarnation on any plane, be it even a highest heaven, you have to become detached from your desires right here and now, while still in the physical body. Then NIRVĀNA shall be yours. So everything (body, emotion, mind, soul, and even spirit) is ANATMAN or not your Self.

Important:: An etheric umbilical cord connects the physical body with the auric bodies. At death the cord is ruptured. During sleep, when the auric bodies leave the physical, this etheric cord assures their return into the physical body the next morning.

Death feeds us to where we come from, which is our original state of existence beyond sense-activity. Being still unable to exist deached from sence- activity, we return, driven by the desire for consciousness, over and over again...

HOW TO DIE

most people are so busy with trying to figure out how to live, that they completely forget to learn how to die. Then, when that moment of Trut comes, they are often shocked, horrified, devastated etc., because everything they have identified themselves so much with (body, emotion, mind etc.), is now being taken away from them.

It is that extreme fear of death, but also the desire for life and sense- activity, which, as already mentioned, often causes an almost immediate reincarnation.

In any case, a person should take great care of how to exit the entry in or of his next life. Example:

If you leave the body through the anal chakra, which is the case with most lowconscious materialistic and sensual people, then it is that chakra and state of awareness which shall dominate your next life. So always concentrate at the moment of death on your HEAD (where the higherchakras or seals are located) and think of God. It shall spare you a lot of suffering after death and in your next life... Once the etheric umbilical cord, connecting the physical body with the remaining six bodies, is ruptured, you are on your own and under the influence of powers and energies created by yourselfe during life on earth. So be wise and prepare right now the conditions for yor life after death, but also for the next one on earth.

IMPORTANT: Let there be ABSOLUTE SILENCE in the sick room and especially at the moment of death, or rather of transition from this world to the next. No babbling proiest. Spare the money and spend it instead on some orange lighth bulbs. Orange light or color facilitates the death- or transistion process. AUM.

3 After-Death States

There are 33 After-Death States or conditions with which on is also connected during life of the physical body, according to his state of desire. It is possible to switch from any of these realms during life to a higher or lower plane. It all depends on one's strength or weakness, or rather on one's ability to change his own destiny and awareness without help or inference of any God or Demon. All realms and their denizens are transient. AUM.

How the 33 aterdeathly states of consciousness are looking like,could be read in the...
