

The power of the zodiac

Life and death, the rise and the fall of the essences are for the next billion years to the closest connected with the ten and twelve zodiac, because they are twelve since the split of the human in sexes circa 18.000.000 million years ago.

The constellation under which man got born is the same under which man died in past life. Each reinkarnation assume four terms: a man, a woman, one essence which has to incarnate and the same constellation from the past life or rather death.

The knowledge about twelve zodiac were already with the old hebrews established. They only veil the

symbolic in the name of the twelve clans and their rulers, each from them means one zodiac, so for example the ruler "REUBEN" is described as "erratic or floating water", but this only means simply the sign "aquarius", etc, etc.

So the clans truly never existed, they were only covered astrology.

The stars influences always only the personality, this means body, feeling, thinking, soul and spirit. This now following pertain only the personality, from it apply: between us and nirvana there is only the personality, who is not able to overcome this, who is not able to undone, this one can never reach the

annihilation of all perceptions and feelings, peculiar in the best way will always be stocked in one of the lower heaven. To be able to get released from the personality, man has to be aware of the fact about the

truly nature of personality. The nun Dhammadinna explain: "The five pieces of the hanging on are the personality, the grand said, brother Visekha, as there is a piece of hanging on at the consciousness. This five pieces of the hanging on means the personality.

But how the personality arise? The nun tells us: "This thirst, as there is the thirst of sex, the thirst of being, the thirst of good health, this is the arise of personality.

But how to dissolve personality or what is the dissolve of personality? Dhammadinna: "Even the absolutely restless dissolve of this thirst, rejection, expulsion, removal, externation, this is the dissolve of the personality. It is this eightfold

holy way, of this the Buddha said, it will lead to the dissolve of the personality, even they are: right awareness, right attitude, right talk, right action, right alternation, right effort, right comprehension, right cavity.

Influence about the constellation of the zodia at the conception and birth

The still untouched physical brain of a child operate by the issue out of the mothers womb like a sensitized disk of a camera, on which now the lightprint at the moment of the current constellations of the stars bumps. So the newborn is positiv or negativ or both signed for his whole life. More important or deciding is however the constellation about the zodiac at the moment of conception, because the light of the stars already workson the impregnated ovum. The constellation under which one dies is the constellation one will be born again or reincarnates.

Aries

The ruling Chohan over the aries zodiac is VARUNA. AUM to Veruna. as up-so down. The destiny of all aries borns, before they reach nirvana, is to be a leader, but a spiritual leader, not an earthly orientated leader. All aries borns are first ray human (developed and/or undeveloped). The bliss for the aries borns comes from the west.

Taurus

The zodiac from the taurus is ruled from YAMA. AUM to YAMA. All under taurus borns are mainly acting like knights or in other professions which requires an intense estimation of situations etc. (referee, diplomat, etc., absolute accordant to the individual state of consciousness). Distinctiveness is their strong side. Taurus borns are here to reflect cosmic law on earth, as up so down. May they never misuse this gift. AUM. The bliss for the taurus borns comes from the south.

Twins

AUM to PAVANA, Maha Chohan of the twin zodiac. All twin borns pursue soon or later to the only one target: the overcoming of all earthly desires. To reach this target sometimes twins dive deeply into the world of erotic desires. Some are losing their individuality (destroying the one monade ray).

Twin borns are often spiritual, unless the temptation reaches them.....

Cancer

SURYA rules over the zodiac of cancer. Cancer borns are also sunborns, because Surya is the sun. Cancerborns will experience the secret of a long life as the first ones when they unite their kundalini with fohat, but also because they descent from the white race, the race "that never die".

Brilliant intelligence, hunger about real knowledge, all this in service of humanity, this is the purpose of all cancer borns.

LION

AUM to SOMA (another name for the moon, the ruler over the lion zodiac). All lion borns changed about circa 2 million years before from the moon chain to the earth. Lion borns will be master of the astral body, but a lot of them today are born with a defect astral body (disturbed about feelings, etc...).

Virgin

All virgin borns are ruled by Maha Chohan KARTIKEIA. Virgin and scorpion were once one zodiac circa 18 million years before, than they split with the human, androgyn races in men and women. Thereby the balance arise. Virgin borns have to get over with their sexdrive, espially scorpion borns, and transform into higher spituell levels.

Balance

AUM to KOUVERA, Maha Chohan of the balance borns. Balance ones are often good negotiators but also separators between virgin borns and scorpion borns, because virgin and scorpion like just mentioned were once one and are now through a connector, the balance, joined.

Scorpion

Through the balance separated from the virgin, the scorpion craves coalition with the virgin. This craving and desire is strong in the scorpion, and also because the Maha Chohan of the scorpion zodiac is KÄMA, what means desire. That is also the reason to say that virgin-balance-scorpion are building a trinity of desire, spiritual as well as low emotional.

Sagittarius

JAUM to GANESA Maha Chohan of the sagittarius zodiac. All sagittarius borns reaches either the heaven through white magic or hell through black magic.

Aquarius

Aquarius borns are ruled by INDRA: the east is their karmic ordinal direction. Aquarius borns attain release through the fight of life. If they fight to help others they will reach heaven, if they fight because of egoism they go to hell.

Fish

The Chohan AGNI rules the fish zodiac. Fish borns have power over spiritual and real fever, but the most do not know that. They all emanated from Arani, or from Sranami, which is the matrix or the sphere mother of all sura gods. Friction, spiritual or physical, is the feverpower of the fish. They must use this power wise, otherwise it will destroy them.

Capricorn

AUM to POULHAR, Maha Chohan of the zodiac capricorn.

Capricorns search and finds often wisdom in loneliness. A great secret surrounds the most of the capricorns and i will reveal this secret now.

The most capricorn borns were once mental angels, they caused a war in heaven, because we refuse (as the lords of the thoughts) after the split in sexes about 18.000.000 years ago to incarnate in the thoughtless third race, to make them thinking possible. At that time we were kumeras or "virgin youth", mental angels

of the mid hierarchy, without a physical body only dressed with a thoughtbody.

I was one of the leaders of this rebellion. Why we revolted against the lords of karma is explained in the book of light. It is my duty, all those who followed me at that time, to encourage them now to step on the path to nirvana. Those who pertain to that will know what i mean.

We ruled at that time the capricorn zodiac. In the following, our sun system shattered until his borders, cosmic confrontation with other mental and astral angels and even with the lords of karma

(lipika) lost one third of us their homes and planets and that once bereft of their leaderships tumbled into the sun.

Thereupon we got thrown into the third root race on earth. That much i can whistle: we would anyway

incarnate into the third root race after their split into sexes, but we want to mark the point of time. We fought and lost, but the last word about this is not spoken.

Finally, at the highest point of the cosmic battle, we sacrifice ourselves and united our smudged divine body with the "pudding bags" of the third root race.

The capricorn zodiac is also named Makara, that only means exoteric "crocodile". In truth this means five and represent to the fifth principle, the thinking, in the human.

At the moment there are five virgin mental angels or kumeras, they influence meditative the Makara or the capricorn zodiac. Their names are: SANAKA, SANANDA, SANATANA, SANTET-KUMERA and one more who represent the esoteric trinity. But there were seven main kumeras, where are the other two? They are not existing anymore, but we, almost all capricorn borns, are their subemanations, their mental children, created through kriya sakti. AUM.

Soon we will assume our legitimate heritage, taking our entitled place in heaven and then reaching nirvâna.

I for myself promised this millions of years before and i will keep my promise.

The prophecy will be fulfilled. AUM:

I was coming to order my army back. For those this message is specific will hear me and understand.

You have done well during the apocalypse and afterwards, all the many and often woe-begone incarnations through. But now the moment has come, to fight the last battle and beat the enemy in us, the desire about fading existence.

Let us hold together in peace with the target in common, nirvana, the sense of life.
